

SAS Hands-On Assignment – SAS Visual Text Analytics – T1 2026

In this hands-on assignment, you are required to conduct a textual analysis using SAS Visual Text Analytics and submit a business report on Moodle page through Turnitin.

The due date of this assignment is on Friday 5pm of Week 6 (27th March 2026).

Please note that this assignment is worth 25% of your overall course mark.

Requirements

Apple Inc. is an American multinational technology company headquartered in California, in Silicon Valley. Founded in 1976 by Steve Jobs, Steve Wozniak, and Ronald Wayne, the company designs, manufactures, and markets a wide range of consumer electronics, computer software, and online services. Apple is widely recognised for its focus on product innovation, aesthetics and design, and user-friendly products that integrate hardware and software seamlessly. Apple's product portfolio includes devices such as the Mac, iPad, Apple Watch, and services such as iCloud, Apple Music, and the App Store. In addition to selling its products through its physical retail stores and official website, Apple also operates online and has its Amazon online store, selling directly on Amazon.com.

In a hypothetical scenario, you are hired as a business analyst at Apple, and you have been tasked to use the software SAS Visual Text Analytics to analyse a dataset called AppleAmazonReviews available on Moodle as an Excel file. The dataset consists of a sample

of 7,000 Amazon reviews of Apple products sold on Amazon.com, covering the period from 10th September 2016 to 23rd August 2023.

Your objective is to conduct a textual analysis to derive actionable insights, and translate these insights into practical recommendations that support your manager in addressing any issues or concerns raised by users and making well-informed, data-driven decisions.

The file AppleAmazonReviews.xlsx, available on Moodle, includes two fields for each review:

- **Title:** Title of the user review
- **Text:** Content of the user review
- **Rating:** Rating of the product (from 1 to 5)
- **Date:** Date and time of the review
- **Helpful_Votes:** Number of helpful votes of the review
- **Verified_Purchase:** Whether the user purchase of the product is verified
- **ASIN:** ID of the product
- **Product_Name:** Name of the product

You are required to conduct the analysis of the dataset using SAS Visual Text Analytics in two parts. Part 1 consists of exploring predefined concepts and automatically generated topics to derive actionable insights from the data. Part 2 consists of creating your own custom concepts and custom categories to address specific research questions and demonstrate critical thinking.

Your business report should include the following components:

- A standard cover page (available on Moodle).
- **Part 1**
 - **Predefined Concepts** (worth 20% of the available marks) – up to 600 words
An exploration of the dataset using TWO (2) relevant predefined concepts.
For each selected predefined concept, your answer must include the following:
 - An explanation of why you believe the selected predefined concept is relevant to your data analysis.
 - A discussion of the findings and the insights that you could derive from these findings. Include relevant screenshots from SAS Visual Text Analytics to support your work.
 - A discussion of the benefits and limitations of relying solely on the selected predefined concepts, supported with relevant examples.
 - **Auto-generated Topics** (worth 20% of the available marks) – up to 600 words
 - Analysis of the dataset using TWO (2) relevant topics among those automatically generated by SAS.

For each selected topic, your answer must include the following:
 - An explanation of why you believe the selected topic is relevant to your data analysis.

- A discussion of the findings along with the actionable insights derived from these findings. Include relevant screenshots from SAS Visual Text Analytics to support your work.

• Part 2

- **Custom Concepts** (worth 30% of the available marks) – up to 800 words

Write TWO (2) custom concepts, each using a different concept rule type.

For each custom concept, your answer must include the following:

- An explanation of the objectives of your analysis
- A justification of the reasons behind your choice of the concept rule type
- The custom concept rule to fulfil the objectives of your analysis
- A detailed explanation of the concept rule syntax
- A discussion of the findings along with the actionable insights derived from these findings. Include relevant screenshots from SAS Visual Text Analytics to support your work.

- **Custom Categories** (worth 30% of the available marks) – up to 800 words

Write TWO (2) custom categories.

- An explanation of the objectives of your analysis
- The custom category rule to fulfil the objectives of your analysis
- A detailed explanation of the category rule syntax
- A discussion of the findings of your analysis, along with the actionable insights derived from these findings. Include relevant screenshots from SAS Visual Text Analytics to support your work.

Word Limit

Each section of the report has a word limit, as indicated in Deliverable. The distribution of word count proportionally reflects the complexity and significance of each section, totalling a maximum word length of 2,800 words. There is a (+10%) leeway in word limits for each section. Please note that screenshots, custom concept and custom category syntax are excluded from the word count. You should be mindful of the marks awarded to each section, as indicated in Deliverable, when allocating the number of words spend on each section. Please note that material presented in excess of the word limit for each section will not be considered when grading the assignment.

Formatting

Please ensure the following requirements:

- Arial 12-point font, 1.5 spacing
- Page numbers on each page
- Cover page included
- All required sections included

Submission

Upload your report document (in Word format) on Moodle.

- You can only upload one report document.
- You are advised to keep a copy of your submission.

The originality of the submission will be checked using Turnitin. Please check the originality report generated by Turnitin during the submission process.

Late Lodgement & Extensions

Late assignments (without approved extensions) will attract a penalty of 5% of the available marks per day of lateness (including weekends and public holidays). The penalty will be deducted from the mark your assignment is awarded. The assessment will not be accepted after 5 days (120 hours) of the original deadline unless special consideration has been approved. General information on special consideration for undergraduate and postgraduate courses can be found in the [Assessment Implementation Procedure](#) and the [Current Students page](#). Please note:

- Extensions are only granted in exceptional circumstances. You will be required to substantiate your application with appropriate documentary evidence such as medical certificates, accident reports etc.
- You should note that extensions are not usually granted for computer-related problems or heavy workloads (at either your job or University).
- Students are expected to manage their time to meet deadlines and to request extensions as early as possible before the deadline.

Penalties

Penalties will apply in the following circumstances:

- The assignment contains spelling and grammatical mistakes
- The submission requirements have not been adhered to.
- The assignment is submitted late (5% of the available marks per day of lateness).
- You should also note that plagiarism or other academic misconduct will not be tolerated, and all instances found will be pursued. At a minimum this typically entails the student being awarded zero (0) marks the plagiarised assignment.

Proper academic standards

All assignments are subject to the University's guidelines regarding academic misconduct and as such plagiarism is as unacceptable in this group assignment as it is in other assignments. If plagiarism is found in your assignment it will be fully pursued as per the University (see <https://student.unsw.edu.au/plagiarism> for details).

Viva Voce

Any student may be called upon to provide a viva voce (from the Latin meaning 'living voice') for any assignment. A viva voce is an interview style meeting where you will be asked to explain, discuss, or use information related to any assignment or work produced for this course. These can be used to ascertain knowledge and ability including the extent to which the student has undertaken the required reading, done preparatory work and can demonstrate understanding of what they have written or presented. Viva voces are used in conjunction with submitted assessment work not instead of submitted work.

Do not remove this notice

There are some file-sharing websites that specialise in buying and selling academic work to and from university students.

If you upload your original work to these websites, and if another student downloads and presents it as their own either wholly or partially, you might be found guilty of collusion — even years after graduation.

These file-sharing websites may also accept purchase of course materials, such as copies of lecture slides and handouts. By law, the copyright on course materials, developed by UNSW staff in the course of their employment, belongs to UNSW. It constitutes copyright infringement, if not academic misconduct, to trade these materials.
